

Model 747 HIGH ACCURACY Dry Block System

Taking in Consideration our immeasurable experience in Metrology, **INSCO** has develop the Ultimate Calibration Machine in the world. Our **Model 747** also know as the Enables Calibration Labs to perform Test at 2 different set points simultaneously with a Single Dry Block.

Impressive? Can you imagine having a reference at -50 Deg C and another at 400 Deg C* at the same time in one unit? **INSCO 747** provides just that. How much time and money can you save? Well that is up to what you want to do in your spare time, This unit will reduce the calibration time by 60%.

The Diamante Series III design is so advance that the unit enclosure remains at room temperature while in operation, Stability on the three wells is obtain in just 40 minutes and heating and cool down periods are lower than the leading competitor without auxiliary devices.

Because of the Modular Design, all inserts can be custom ordered to meet your specific needs and applications. The unit is provided with a traceable Certificate of Calibration by one of our NVLAP Accredited laboratories

Key Features

- True Calibration
- Portable Design
- Stainless Steel Cabinet Standard
- Stability Calibration Data provided for each unit

*1000 Deg C Optional
